AWS 95: DigiChannel Nu/Xi Card Works (6/93)

==========

Article Created: 3 June 1993

TOPIC ----------

Has the DigiChannel Nu/Xi card, by DigiBoard, been tested with the AWS 95? What version of the driver do we need?

DISCUSSION ----------

There was a bug report regarding a DigiBoard NuBus card that couldn't be recognized by Apple Workgroup Server (AWS) 95 server. According to the status, and actually talking with an A/UX engineer, the bug has been fixed in the final GM of A/UX 3.0.1 kernel for the AWS 95 server with the latest DigiBoard driver's software patched v 3.1.
