TOPIC ---

Here are the specifications for the Apple Extended Keyboard II.

DISCUSSION --

Description:

  The "Apple Extended Keyboard II" is the replacement for the existing
  Apple Extended Keyboard (M0115). In addition to the features of the
  existing keyboard, the Apple Extended Keyboard II provides a foot to
  adjust the height of the keyboard and a double-sided template to label
  the function keys.

Packing List (M0312):

  Apple Extended Keyboard II
  1.0 m (3 ft.) ADB cable
  Double-sided template to place over function keys
  Owner's guide
  Warranty statement

System Requirements:

  Any Apple personal computer with an Apple Desktop bus interface

Technical Specifications:

  Total 105 keys, including
  18-key numeric pad
  15 function keys
  4 arrow cursor-control keys in inverted T-style layout
  6 cursor-control keys (Home, Page Up, Page Down, Forward Delete, End,

```
  and Help)
```

Size and Weight:

```
  Front Height:      0.75 in. (19 mm)
  Rear Height:       1.6 in. (41 mm)
  Keyboard angle:    14 degree maximum
                     6 degree minimum
  Width:             18.7 in. (475 mm)
  Depth:             7.7 in. (195 mm)
  Weight:            4.8 lbs (1.8 kg)
```

Product Details:

The keyboard has 15 function keys (F1-F15) and 6 cursor-control keys (home, Page Up, Page Down, Forward Delete, End, and Help).

F1-F4 are labeled on the housing under the keys F1=undo, F2=cut, F3=copy, and F4=paste. These are not predefined default values; however, developers are being encouraged to use these definitions as appropriate. The remaining 11 function keys can also be defined by the user. A template is provide for users to mark the key's function.

The remapping facility is available for a specific application or globally for all applications.

The function keys are operative by using a macro utility program or by using an MS-DOS application with the appropriate coprocessor card.

The Caps Lock LED is operative in the Macintosh environment. The Num Lock and Scroll Lock are not operative except by using an MS-DOS application with appropriate coprocessor card. Developers are being encouraged to support these LED's in their applications.

The keyboard has an adjustable foot in the rear of the keyboard. The height of the keyboard is adjusted with a lever in the rear of the keyboard. It can be adjusted with a tilt from the unextended 6 degree to a maximum of 14 degrees from horizontal.
