WPL: How to make AUTOLETTER use surnames

Make these modifications to the WPL program Autoletter on page 96 of the AppleWriter III manual as follows:

BEFORE _____ L .D1/ADDRS! < (X) > ! < !NPGO FOUND PGO QUIT PLS .D1/ADDRS!<(X)>! !N=\$A FOUND AFTER ____ L .D1/ADDRS! < (X) > !@!NPGO FOUND PGO QUIT FOUND PLS .D1/ADDRS!@(X)@!<!N=\$A Then modify your address file as below: BEFORE AFTER _____ ____ <1>John Smith <1>John Smith 1234 Elm Street 1234 Elm Street Anytown, USA 12345 Anytown, USA 12345 <2>Jane Doe @1@Mr. Smith<2>Jane Doe 5678 Main Ave. 5678 Main Ave. Nowhere, Indiana 98765 Nowhere, Indiana 98765

and it affords the flexibility of using a different "dear" name than the first line of the address (i.e., Company Name on the first line of the address).

This method also works quite well with Apple Writer II & IIe. For the file name path .D1/ADDRS, substitute ADDRS,D1 for DOS or simply ADDRS for ProDOS.
