Company Profile:
Hardware, Macintosh, Apple IIGS, and VGA splitter video connections.

The Presenter 520 connects a Macintosh LC 520 to both Apple and third-party VGA monitors and LCD panels. Because it clips onto the VRAM SIMM, it doesn't occupy the PDS slot. (Not compatible with the Apple Basic Color Monitor, or any other non-multisynched VGA compatible monitor.) Power R has similar products for the Macintosh Color Classic, Classic II, Classic, SE/30, SE, Plus, and 512K.
