AppleLine: Capabilities

Revised: 8/19/87
Security: Everyone

AppleLine: Capabilities

=====

AppleLine will replace a 3278 Model 2 on a IBM 3274 or 3276 control unit (cluster controller). It supports a 25 line display and 80 or 132 columns. It must be used in conjunction with a 3270 type emulator on the Apple product; 4 user passwords and one supervisors password are supported. It can also be attached to the Apple product via asynchronous modems.
