Lisa Office System 3.1: Installing with BASIC Workshop 3.0

==

BASIC Workshop 3.0 is fully compatible with Lisa Office System Release 3.1.

If you wish to install the Office System 3.1 and BASIC Workshop 3.0:

   1. Back up your documents currently stored on the hard disk.

   2. Install the Office System 3.1. Follow the steps in Chapter 6 of the
      Lisa Office System manual. Select Erase, then select Share if you wish
      to share the hard disk with Macintosh software.

   3. Install BASIC Workshop 3.0. Follow the steps in Chapter 1 of the
      Workshop manual. Select Don't Erase when prompted.

NOTE: Running StartUpdate is not required for the BASIC Workshop; as a matter
        of fact, running it will cause an error to be displayed. Although you
        must run StartUpdate to update Pascal 3.0, doing so will not harm
        BASIC.
