Anchor Signalman Express modem: Using it with all Apples

=====

Modem type:

AT&T 103/212A series, 1200/300 bps.

Instruction set used:

Fully HAYES compatible.

Hardware configuration:

Eight LED indicators on front panel give modem and data status. Internal back-up battery provides RAM power for auto-dial number storage in memory. Modem runs off of external +12V plug in power supply. Built-in speaker with front panel volume control is used to monitor operation and diagnostics.

Software configuration:

Microprocessor controlled intelligent modem with number storage, auto-dial and auto-answer functions.

Interface type:

RS-232 DB-25S (DCE) connector, full duplex operation.

Modem interface packages, by computer:

Apple IIe (Super Serial card):

Access II or other terminal software; straight through DB-25 cable interface (with serial card configured as DTE equipment) for hardware connection.

Apple IIc:

Access II or other terminal software; Apple IIc to Imagewriter cable with modem eliminator cable for hardware connection.

Apple III:

Access III or other terminal software; straight through DB-25 cable for hardware connection.

Macintosh:

MacTerm or other terminal software; Macintosh to Imagewriter cable with modem eliminator cable for hardware connection.

Macintosh XL:

MacTerm or other terminal software; straight through DB-25 cable for hardware connection.
