Macintosh Finder 4.1: Maximum of 25 Selected Icons

=====

Article Created: 18 February 1986
Article Last Reviewed: 2 February 1991
Article Last Updated:

TOPIC -----

Why does selecting numerous icons under Finder 4.1 produce an error message?

DISCUSSION -----

When you use Finder 4.1 to select and move a group of more than 25 icons to another icon (folder, Trash can, floppy disk, and so on.), the system responds with error ID=02, regardless of the view. You've reached the upper limit.
