AppleColor RGB Monitor: How To Connect It To The Apple Iic

=====

This article last reviewed: 29 September 1988

While limited to only 8 colors, the AppleColor RGB Monitor does work with the Apple Iic with:

1) a Telemax Inc. "Peacock" RGB interface for the complete connection (like the connection for the Apple Color 100 Monitor)
and

2) a new interface cable, the pinouts of which are:

DB15 Pin	DB15 Pin
1	6
2	5
3	3
5	2
6	1
9	9
10	10
13	13
Shell	Shell

For more information, search under: "Telemax Inc."
