Apple Personal Modem: Pinouts for IBM-Compatible PCs

=======================================================================

This article last reviewed: 13 January 1988

You can use the Apple Personal Modem with an Epson QX 16 or other IBM
compatible, as long as the compatible system has an RS-232 communication
port.

Here is the standard pinout configuration for connecting the Apple Personal
Modem's circular-8 connector to a common DB-25 connector:

Supported RS-232 data lines.
Mini-circular-8                                 RS-232
DIN  Function                   Direction       Pin

1    Data Set Ready (DSR)       From Modem        6
2    Data Term Ready (DTR)      To Modem         20
3    Receive Data  (RXD)        From Modem        3
4    Signal Ground                                7
5    Transmit Data (TXD)        To Modem          2
6    Signal Ground                                7
7    Data Carrier Detect (DCD)  From Modem        8
8    Not connected (n.c.)
