EtherTalk Card Software: v.1.1 Improves DECnet Compatibility

```
======================================================================
```

This article last reviewed: 31 March 1988

Version 1.1 of the EtherTalk software supports multicast message selection
and can set the Ethernet address of the EtherTalk card. This enhancement
makes the EtherTalk Card more compatible with DECnet.

Version 1.1 of the EtherTalk software is currently shipping with the
EtherTalk cards.
