Macintosh II 800K Drive: Compatible With Macintosh IIX

=====

Article Created: 23 March 1989
Article Last Reviewed: 20 July 1992
Article Last Updated:

TOPIC -----

Are the 800K floppy drives from a Macintosh II computer compatible with a Macintosh IIX computer?

DISCUSSION -----

Macintosh II floppy drives are completely compatible with the Macintosh IIX. The Macintosh IIX ROMs and SWIM chip were in fact designed with this capability.
