Status of Switcher

===

This article last reviewed: 22 June 1989

TOPIC --

This article discusses the status of Switcher as of June 1989.

DISCUSSION ------------------------------------

1) Switcher was not a public domain product and has been discontinued.

2) It still is supported by Apple: Finder 5.3, System 3.2.

3) For most users, Switcher has been replaced by MultiFinder. However, it
   is still a viable option for Macintosh XL, Macintosh 512K, Macintosh 512Ke,
   and 1MB Macintosh Plus systems.
