MacX25: Modem Capability

=====

This article last reviewed: 25 September 1989

TOPIC -----

What modems are compatible with MacX25? Will MacX25 work with internal 2400 baud modem?

DISCUSSION -----

MacX25 supports RS232C (V.24/V.28) and V.35 connections. Modems which use these correctly work with MacX25. MacX25 does not support an internal 2400 baud modem.
