TOPIC ---

I have a corrupt HyperCard stack.

Other than copying the information on the stack to a new stack (there are over
2000 cards), is there anything I can do to patch the stack, such as deleting
or recovering the card?

DISCUSSION ---------------------------------------

We recommend that you use the recovery stack posted on AppleLink. To locate
the stack called "Recover Stack.sit", use the BB Pathfinder in the AppleLink
Information folder.
