Screen-Dump II: Description

=====

This article last reviewed: 2 November 1989

TOPIC -----

This article discusses a shareware program named Screen-Dump II.

DISCUSSION -----

Screen-Dump II is an FKEY to replace the old Apple FKEYs 3 and 4. Screen-Dump II works on all Macintoshes and adjusts to all screen sizes. Included are three FKEYs, two to dump to black and white (whether or not you are using color). The other one is for dumping to PixelPaint, GIFF, GrayView, or StartUpScreen format in full 256 colors.
