A/UX: Accessory Kit README File Correction

==

Article Created: 3 October 1989

Article Change History

08/31/92 - REVIEWED
            • For technical accuracy.

TOPIC ---

The README file that comes with the A/UX Accessory Kit tells the user to phone
408-446-9836 for software patches.

I've tried this number several times without success. Is it the wrong number,
or has the service not been turned on yet?

DISCUSSION --

At present, the facility for providing A/UX software patches service has not
been set up yet; the number 408-446-9836 is no longer in service. Please ignore
the above information in the README file of the "A/UX System Setup and README"
floppy disk at this time. We will announce the number as soon as this facility
is completed.
