KanjiTalk 6.0.2.4: Macintosh SE/30 and IICx Compatibility

=====
This article last reviewed: 12 December 1989

TOPIC -----

Does KanjiTalk work on a Macintosh IICx?

DISCUSSION -----

Yes, KanjiTalk does work on the Macintosh IICx. However, the correct version of KanjiTalk is required.

The version required for use with the Macintosh IICx and Macintosh SE/30 is 6.0.2.4. This version is now available from APDA.
