### TOPIC -----

What System Software (System, Finder, and AppleShare) versions can be used on the Macintosh 128K, Macintosh XL, Macintosh 512, and Macintosh 512KE?

### DISCUSSION -----

#### Macintosh 128K

-----  
Currently ships with: Product no longer available.  
Supports: System 2.0 and Finder 4.1.  
Recommended: System 2.0 and Finder 4.1.  
For AppleShare, use: Can not be used as an AppleShare file server or workstation.

#### Macintosh XL

-----  
Currently ships with: Product no longer available.  
Supports: System Software 1.0 and System Software 1.1.  
Recommended: System Software 1.1.  
For AppleShare, use: Can not be used as an AppleShare file server or workstation.

#### Macintosh 512K

-----  
Currently ships with: Product no longer available  
Supports: System Software 1.0 and System Software 1.1  
Recommended: System Software 1.1.  
For AppleShare, use: The Macintosh 512K cannot use the AppleShare 2.0 workstation software. You can still use the AppleShare workstation software version 1.1 with a file server that uses AppleShare File Server 2.0, although you will not be able to take advantage of

the new features of AppleShare File Server 2.0.  
System 3.3 and Finder 5.5 are installed by the  
AppleShare 1.1 Work Station Installer disk.

Macintosh 512KE

-----  
Currently ships with: Product no longer available

Supports: System Software 1.0, System Software 1.1, System Software  
2.0, and System Software 2.0.1.

Recommended: System Software 2.0.1.

For AppleShare, use: System 3.3 and Finder 5.5 are installed by the  
AppleShare 1.1 Work Station Installer disk; System  
3.4 and Finder 6.1 are installed by the AppleShare  
2.0 Macintosh 512KE Work Station Installer disk. This  
machine can not be used as an AppleShare file server.
