 - For accuracy.

TOPIC -----

What do you recommend for recovering data from a "soft-crashed" hard-disk?

DISCUSSION -----

We know of three disk recovery packages. We have used Symantec Utilities for the Macintosh II from Symantec and The Norton Utilities for the Macintosh from Peter Norton Computing (acquired by Symantec Corp). Both products work as advertised. We also know of Copy II/Mac and PC Tools/Macintosh from Central Point Software.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
