Macintosh IIsi: Compatibility With Selected Software 1/93

=====================================================================

Article Created: 15 October 1990
Article Reviewed/Updated: 27 July 1993

Apple recommends that customers use the latest versions of Macintosh
software that are compatible with their Macintosh hardware.  Apple compiled
the following list from information received from many software
developers.  These developers have recommended certain versions of their
software for use with the Macintosh IIsi computer.

This is not a comprehensive list of programs, or versions of programs, that
are compatible with the Macintosh IIsi.  Please contact your dealer or the
software developer if you have any questions. They can help you identify the
newest version of a particular program and tell you how to upgrade if
necessary.

Developer                  Program/Version            Telephone
------------------------   -------------------------  ------------
Abacus Concepts, Inc.      StatView II  1.03 (1)       800-666-7828
                           StatView SE+Graphics  1.03
                           SuperANOVA for Mac II  1.1 (1)
                           SuperANOVA for Mac+  1.1
ACI US, Inc.               4th Dimension  2.0.11, 2.1  408-252-4444 ext. 4
