DAL 1.0, 1.1: Incompatibility with HyperCard 2.0

===

TOPIC ---

I found a bug with HyperCard 2.0 and DAL (formerly called CL/1).
Evidently, the cl1putval XCMD does not actually return data to HyperCard
2.0. The cl1getlist XCMD does, however. I am running DAL 1.0, because we
have a VMS 4.7 system and cannot upgrade for a variety of reasons.

DISCUSSION --

The DAL Support group told us that there were known incompatibilities
between DAL version 1.0 or 1.1 with HyperCard 2.0. Because you cannot
upgrade to a later VMS release to run DAL 1.2, we suggest you not use
HyperCard 2.0 with DAL 1.0.
