TOPIC ---

A/UX 2.0 CommandShell won't show graphics characters in VT100 mode.
Instead, letters are displayed in place of the desired lines The font used
was Monaco.

Can the graphics characters be displayed on the CommandShell window? Is
there a font which must be installed to give the VT100 graphics characters?

DISCUSSION --

The current version of Console Emulator in A/UX 2.0 isn't a full VT100
emulator and doesn't support the graphics-characters mode.
