ImageWriter: Can't Use Null (00) Code

=====
Article Created: 29 April 1991
Article Last Reviewed:
Article Last Updated:

TOPIC -----

Can the ImageWriter II do anything with a null (00) code?

Is there anything I can send to the ImageWriter II to simulate the old "bell" ACSII function?

DISCUSSION -----

The ImageWriter can't do anything with a null (00) code. There is nothing you can send to the printer to simulate the "bell" ASCII function because the printer has no speaker.
