TOPIC -----

Why can't I print anything larger than 8.5 x 14 inches on my LaserWriter?

DISCUSSION -----

The maximum printable area of a LaserWriter is 6.75 x 13.0 inches when centered on an 8.5 x 14 inch page.

The LaserWriter II engine has a minimum left, right, top, and bottom margin of 0.197 inches. This gives the LaserWriter II a printable area of 8.106 x 13.606 inches. So, the only way to get a larger print area is to use a LaserWriter II series printer.
