TOPIC ---

I have created a stack of 200 cards with HyperCard version 1.2.5. I
want to print out cards 1, 5, 10, 15, and 20 without printing the whole
stack. What script would do this?

DISCUSSION --

In a button, put the following script:

```
  on mouseUp
    set lockscreen to TRUE
    put the short name of this card into ThisCard
    go to card 1
    doMenu "Print Card"
    go to card 5
    doMenu "Print Card"
    go to card 10
    doMenu "Print Card"
    go to card 15
    doMenu "Print Card"
    go to card 20
    doMenu "Print Card"
    go to card ThisCard
  end mouseUp
```
