AppleTalk: Where To Find Protocol Information

=====

This article last reviewed: 19 February 1991

TOPIC -----

Is there a technical reference that outlines or specifies the series of AppleTalk-related calls to logon to an AppleShare server? I would like to query the server for some user and password information.

DISCUSSION -----

"Inside AppleTalk", published by Addison-Wesley, has all of the AppleTalk protocols and the other information you need.

For more information, search on "Addison-Wesley".
