ImageWriter II: Switch Settings for Use with a Apple IIe

========================================================================

This article last reviewed: 15 July 1990

TOPIC -------------------------------------------------------------

What are the proper settings for using an Apple IIe with a Super
Serial Card to an ImageWriter II?

DISCUSSION --------------------------------------------------------

The settings should be:

Super Serial Card
SW1  1  off
     2  off
     3  off
     4  on
     5  off
     6  on
     7  on

SW2  1  on
     2  off
     3  off
     4  off
     5  on
     6  off
     7  off

Jumper  block pointed toward terminal.

ImageWriter II
SW1  1  off
     2  off
     3  off
     4  off
```

```
          5   off
          6   on
          7   off
          8   off

SW2   1   on
      2   on
      3   off
      4   off
```

Cable: 590-0335 or 590-0556
