Pers. LaserWriter: Problems Caused by Too-Small Margins (12/94)

=====
Article Created: 13 May 1991
Article Reviewed/Updated: 05 December 1994

TOPIC -----

I want to print legal size documents on a Personal LaserWriter LS. The left and right margins are cutting into the text. The margins are set up at 0.265 left and right.

Is this because of the limited memory? Will a memory upgrade fix this problem?

DISCUSSION -----

The problem you've reported exists in both the Personal LaserWriter LS and Personal LaserWriter SC drivers. A memory upgrade will not address the problem.

According to the Personal LaserWriter specifications, the imageable area left and right margins of 0.25 inch should be the same for both US Letter and US Legal sized documents.
