Macintosh LC: IIe Mode to HP Deskwriter

=====

Article Created: 14 June 1991
Article Last Reviewed: 23 July 1992
Article Last Updated:

TOPIC -----

Can my Macintosh LC, in Apple IIe mode, print to an HP DeskWriter?

DISCUSSION -----

As long as the DeskWriter's driver works with the Macintosh LC and System 6.0.7, you can print. A Macintosh LC with an Apple IIe emulation card can access LocalTalk and serially connected printers.
