TOPIC -----

Is there a current version of the utility called Muffin found on the Apple IIe Master Disk? I have the version that converts DOS 3.2 files, but I need the version that converts DOS 3.3 and DOS 4.0.

DISCUSSION -----

The last version of DOS was 3.3. Muffin converts from DOS 3.2 to DOS 3.3. There is only one version of Muffin.

If you are talking about converting from DOS 3.3 to ProDOS, then you can use your ProDOS system utilities to copy the files from a DOS 3.3 disk to a ProDOS-formatted disk. The conversion is automatic during the copy.
