HyperCard 2.0: 32K Limit for Scripts and Fields

======================================================================

Article Created: 25 June 1991
Article Last Reviewed:
Article Last Updated:

TOPIC ------------------------------------------------------------

I know there was a 32K limit to the number of characters in a HyperCard
script.  Is this still true in HyperCard 2.0?

DISCUSSION -------------------------------------------------------

Yes, the limit remains 32K for the number of characters you can have in a
HyperCard script or field.  This limit does not apply to variables.
