TOPIC -------------------------------------------------------------

We experience a high failure rate in connecting to the DAL VM Server using
IBM's TCP/IP 2.0.

DISCUSSION --------------------------------------------------------

There is a known conflict with IBM's TCP/IP 2.0 for VM, and an APAR is
available from IBM that will fix the problem.  The APAR number is PN02784,
and has been very successful for the beta site.
