Macintosh SE: Upgrading to use SuperDrive (Discontinued)

=====
Article Created: 13 August 1991
Article Review/Updated: 15 September 1995

TOPIC -----

Can I hookup an external FDHD SuperDrive to an older Macintosh SE that has only 800K internal drives?

DISCUSSION -----

The external SuperDrive requires the FDHD ROMs just as the internal SuperDrive does. There is an FDHD upgrade kit available through authorized dealers that allows older Macintosh SE's to use the Apple SuperDrive (formerly Apple FDHD).

This upgrade has been discontinued.

Article Change History:
15 Sep 1995 - Revised to show discontinued upgrade.
