AppleShare 3.0: User Setup Dialog Box

=======================================================================

Article Created: 15 October 1991
Article Last Reviewed:
Article Last Updated:

TOPIC -------------------------------------------------------------

A change in the User Setup dialog box gives the administrator more control
over user passwords.

DISCUSSION --------------------------------------------------------

The administrator can force users to change passwords the next time
they log on.  This is useful when creating several users and giving
simple default passwords, such as initials.
