Macintosh IIsi: How to Install A/UX 2.0.1 Incremental Update

=====================================================================

Article Created: 17 September 1991
Article Last Reviewed: 3 July 1992
Article Last Updated:

TOPIC -----------------------------------------------------------

How do I install the A/UX 2.0.1 Incremental Update on my Macintosh IIsi?

DISCUSSION ------------------------------------------------------

First, install the A/UX 2.0.1 Incremental Update on a hard drive attached
to a different Macintosh.  Then move that hard drive to the Macintosh IIsi.

The A/UX 2.0.1 installation works on a Macintosh IIsi, but the Incremental
Update does not.
