TOPIC ---

With A/UX 3.0, is it possible to back up to tapes as large as 250MB?

DISCUSSION --

The MaxStream 250Q tape drive from Archive works under A/UX 2.0 and later.
It can store up to 250MB of data on a DC6250 cartridge.

A/UX 3.0 Peripheral Compatibility Testing found that the other three
Archive drives worked under A/UX 3.0. These three drives are listed here:

- Archive ST2000 (2GB) 4mm DAT

- Archive 150 (150MB) 1/4-inch cartridge drive

- Archive 525 (525MB) 1/4-inch cartridge drive
