PowerBook: International Keyboards 2/92

=====

Article Created: 17 February 1992

TOPIC -----

What international keyboards are available for the Macintosh PowerBook series? I am particularly interested in a Swedish keyboard for one of my international customers.

DISCUSSION -----

In the United States, the only keyboard available for purchase through service is the U.S. version. All other keyboards listed are on a like-by-like exchange basis only.

Keyboards available for exchange on the Macintosh PowerBook 100 are Canadian, Spanish, and Japanese. Keyboards available for exchange on the Macintosh PowerBook 140/170 are British, French Canadian, German, Spanish, French, Japanese, Swedish, and Italian.

Customers who want to obtain a keyboard for a specific language need to contact a reseller or distributor in that particular country to order the part.
