OneScanner for Windows: Hardware Compatibility

=====  
Article Created: 23 March 1992  
Article Last Reviewed:  
Article Last Updated:

### TOPIC -----

Apple OneScanner for Windows has been confirmed compatible with many IBM PC models and with PC-compatible systems from other manufacturers.

### DISCUSSION -----

#### Compatible

-----  
It would be impossible to test OneScanner for Windows with every brand of Windows-compatible hardware. It should work on most of them. These are the ones we've tested to date:

- ALR PowerFlex 386sx
- ALR486
- AST 486
- Compaq 386/33
- Compaq 486 EISA
- Dell System 325
- Gateway 386/25
- HP Vectra 386/25c
- IBM PS/2 Model 40
- NEC PowerMate 386/25s

#### Not Compatible

-----  
OneScanner for Windows is incompatible with the built-in SCSI implementation found on the IBM PS/2 model 95.

OneScanner for Windows is incompatible with all current Northgate PCs.
