PowerBook: Identifying Inverter Board Revisions (11/92)

=====
Article Created: 27 October 1992

TOPIC -----

The Service Price Pages for the PowerBook 140 show a Revision A and a Revision B of the inverter board, but don't describe them the way the Technical Procedures do.

DISCUSSION -----

The Technical Procedure Manuals describe them as "RED" and "BLUE" to match the color of the display cable. The Illustrated Parts List does list them to match the Technical Procedure Manuals. Here's how they correlate:

Part Number 699-0271 = Rev A = Blue
Part Number 699-0272 = Rev B = Red
