PowerBook Duo 210: Description (Discontinued)

=====================================================================

Article Created: October 19, 1992
Article Reviewed/Updated: 14 March 1995

TOPIC -------------------------------------------------------------

This article describes the Macintosh PowerBook Duo 210 notebook computer.

DISCUSSION --------------------------------------------------------

Overview
--------
The Apple Macintosh PowerBook Duo 210 offers high performance in a 4-pound
package that you can take anywhere and can become part of a complete desktop
Macintosh system when you bring it back to your desk. It includes a CPU,
full-size 16-gray-level supertwist display, keyboard and trackball, battery, and
disk storage.

The PowerBook Duo 210 can be transformed into a desktop Macintosh by attaching
it to an optional Duo Dock or MiniDock.  You can then work with a large color
display, full-size keyboard, printers, and network servers.

PowerBook Duo 210 Features
--------------------------
• Processor: 25-MHz 68030 microprocessor

• Memory: 4MB  RAM, expandable to 24MB

• Weight: 4.2 lb. (1.9 kg)

• Expansion: Docking connector, connectors for internal modem and RAM

• Display: Backlit Supertwist, 16-level gray scale, 640 by 400 pixels

• Battery: Nickel hydride batteries for approximately 2 to 4.5 hours of use

• System software: System 7.1, with multitasking, file sharing, Balloon
```

Help, and TrueType fonts

* Networking: Built-in AppleTalk networking, file sharing without a
  dedicated server

* Compatibility: Macintosh, MS-DOS, OS/2, and ProDOS floppy disk formats

Article Change History:
14 Mar 1995 - Corrected wording of MiniDock.
