PowerBook Duo 230: Description (Discontinued)

=====
Article Created: 19 October 1992
Article Reviewed/Updated: 14 March 1995

TOPIC -----

This article describes the Macintosh PowerBook Duo 230 notebook computer.

DISCUSSION -----

The Apple Macintosh PowerBook Duo 230 offers top-of-the-line performance in a 4-pound package that you can take anywhere and can become part of a complete desktop Macintosh system when you bring it back to your desk. It includes a CPU, full-size screen, keyboard and trackball, battery, and disk storage. The PowerBook Duo 230 also includes a 16-gray-level supertwist display.

The PowerBook Duo 230 can be transformed into a desktop Macintosh by attaching it to an optional Macintosh Duo Dock or MiniDock. You can then work with a large color display, full-size keyboard, printers, and network servers.

Features -----

- Processor: 33-MHz 68030 microprocessor
- Memory: 4MB RAM, expandable to 24MB
- Weight: 4.2 lb. (1.9 kg)
- Expansion: Docking connector and connectors for internal modem and RAM
- Display: Backlit Supertwist, 16-level gray scale, 640 by 400 pixels
- Battery: Nickel hydride batteries for approximately 2 to 4.5 hours of use
- System 7.1, with multitasking, file sharing, Balloon Help, and TrueType fonts
- Networking: Built-in AppleTalk networking, file sharing without a dedicated

server

- Compatibility: Macintosh, MS-DOS, OS/2, and ProDOS floppy disk formats

Article Change History:

14 Mar 1995 - Corrected wording of MiniDock.
