Performa: Sound Problems (7/93)

=====  
Article Created: 20 July 1993

TOPIC -----

I am not getting any sound out of my Performa 450.

DISCUSSION -----

Check your speaker connection on the back of your Performa 450. A common mistake is plugging the microphone into the speaker port, instead of the microphone port. If this does not solve the problem, contact the Apple Assistance Center at (800) SOS-APPL.
