Quadra 840AV: On & Off Switch (8/93)

===

Article created: 10 August 1993

TOPIC ---

This article explains the on and off switch on the Macintosh Quadra 840AV.

DISCUSSION ---

Under most conditions, you should use the Power key on the keyboard and
the Shut Down command from the Special menu in the Finder to turn your
Quadra 840AV on and off. If a program locks or hangs but you can still
move the pointer, you can press and hold the on/off switch for 2 to 3
seconds to turn off the machine.
