Retrospect: Error 34 (volume full) 8/93

=====

Article Created: 18 August 1993

TOPIC -----

What is an "Error 34 (volume full)" error in Retrospect?

DISCUSSION -----

Error 34 (volume full) means that a volume has run out of free storage space. You will see this error in the following situations:

- If you are restoring more files to a volume than will fit.

Solution: Try restoring fewer files, or restore to a larger volume.

- When Retrospect is updating a StorageSet Catalog during a backup and the volume where the Catalog is located runs out of room.

Solution: Check your hard disk to see if it is full, or close to full.

- If you are backing up to a Macintosh File StorageSet and the destination volume runs out of free space.

Solution: Check the hard disk containing the Catalog file, to see if it is full.
