Duo Type II Recharger: Marketing Number Correction (11/93)

=====  
Article Created: 11 November 1993

TOPIC -----

I bought a PowerBook Duo Rechargeable Battery High Capacity Type II (M1835LL/A).  
It came with a slip of paper advising me to use "M1812" to charge the battery.  
I assumed this was a new battery recharger, but it's not in the product list.

DISCUSSION -----

The marketing number M1812 is inaccurate. The correct number for the Type II  
Duo Battery Recharger is M4178LL/B (Service Part 922-0576).
