ARA 2.0 MultiPort Server: How To Export User Lists (11/93)

=====  
Article Created: 15 November 1993

TOPIC -----

This article describes how to export the User List into a tab delimited text file, which you can then import to another server.

DISCUSSION -----

To export the User List:

- 1) Make sure that the User List window is active.
- 2) Choose Export User List from the Users menu.

A directory dialog box appears in which you can name the exported User List and save it.

- 3) Enter a name and click Save.

The exported list is saved. You can view the list in any application that accepts tab delimited data.

IMPORTANT: Although a Password header appears in the document, passwords are not exported.
