PowerBook 270c and StyleWriter II (6/94)

=====================================================================

Article Created: 2 December 1993
Article Reviewed/Updated: 20 Jun 1994

TOPIC -------------------------------------------------------------

I'm having trouble printing from a PowerBook 270c to a StyleWriter II. (It
prints if the Dock is attached.)

DISCUSSION --------------------------------------------------------

Here are the settings you need:

• AppleTalk must be inactive

  or

  Remote Only (or EtherTalk, if that's installed) must be selected in the
  Network control panel.

• The Modem Port must be selected in the StyleWriter II Chooser document. Press
  the "Setup" button and then say OK, even though you don't plan to "share"
  the printer.

• The PowerBook Setup control panel must be set to "Normal". The default
  setting is "Compatible"

Article Change History:
20 Jun 1994 - Changed control panel contents to the correct information.
