HyperCard: Setting Text Size (7/92)

======================================================================

Article Created: 4 November 1990
Article Reviewed/Updated: 23 July 1992

TOPIC -----------------------------------------------------------

Here's a handler you can use to set the font size (in points) of text in a
given field.

DISCUSSION ------------------------------------------------------

on mouseUp -- (or openCard or any other handler)
   set TextSize of field x to 18 -- (or any specified point size)
end mouseUp -- (or openCard or any other handler)

This works in versions 1.2.5 and 2.0x of HyperCard.
