HyperCard: Handler for Protecting Button Scripts (7/92)

===

Article Created: 11 January 1991
Article Reviewed/Updated: 23 July 1992

TOPIC --

Here's a handler that asks for user confirmation before deleting any button
that has a script.

DISCUSSION ---

```
on protectButton whichButton
if script of whichButton is empty
  then exit protectButton
  answer "Delete " & whichButton & "?" with "OK" or "Cancel"
  if it is not "OK" then select empty
end protectButton
```
